

MERTHYR TOWN HALL

PROJECT SUCCESS STORY

THE BRIEF

Merthyr Town Hall is a late Victorian Grade II listed building in the heart of the Welsh valleys currently used as an arts and creative industries centre. As part of some required refurbishment work the client decided to upgrade their radiators and wanted a heating solution that would not only deliver exceptional outputs but also keep in line with the building's classic style.

OUR SOLUTION

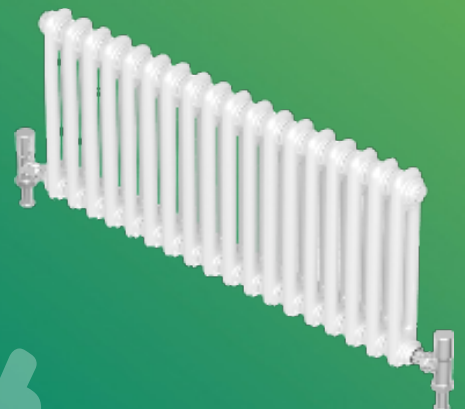

56 of our Multicolumn radiators were supplied, in a variety of sizes, columns and orientations, for applications which range from sitting under low level window sills to heating large open spaces. The Multicolumn allowed for a traditional look without sacrificing performance.

LOCATION: MERTHYR TYDFIL

SECTOR: REFURB, PUBLIC

PRODUCTS: 56 MULTICOLUMN RADIATORS

KEY FEATURES: HIGH HEAT OUTPUT, HORIZONTAL OR VERTICAL OPTIONS & AVAILABLE FROM 2 TO 6 COLUMNS

"WE WANTED A CLASSIC LOOKING & HIGH PERFORMING RADIATOR FOR OUR GRADE II LISTED BUILDING & THE MULTICOLUMN WAS THE PERFECT CHOICE."
