

## ROYAL WHARF - PHASE 2A

### PROJECT SUCCESS STORY

#### THE BRIEF

The Royal Wharf development is part of a £1 billion regeneration project in East London that has involved the creation of 3,385 new apartments & 10,000 square metres of commercial space, making it one of the largest residential projects in Europe. The client wanted these luxury apartments to have a bespoke heating solution that would not only compliment the modern style of the new buildings but also deliver excellent energy efficiency.

#### OUR SOLUTION

In response 2,500 of our fully compliant, vertical Precision radiators were installed in various different sizes to suit the requirements of each individual apartment; offering both class-leading outputs and an extremely aesthetically pleasing appearance.

**LOCATION:** SILVERTOWN EAST LONDON

**SECTOR:** NEW BUILD, RESIDENTIAL

**PRODUCTS:** 2,500 VERTICAL PRECISION RADIATORS

**KEY FEATURES:** CLASS-LEADING OUTPUTS, OVER 4,600 SIZES & 200 RAL COLOURS AVAILABLE

"WE HAD THE PLEASURE OF WORKING WITH MERRIOTT ON PHASE 2A AT THE ROYAL WHARF, WHICH INVOLVED INSTALLING 2,500 OF THEIR VERTICAL PRECISION RADIATORS."
