ST JOSEPH'S HOSPITAL

PROJECT SUCCESS STORY

THE BRIEF

St Joseph's Hospital based in Newport, South Wales, is a private health centre which contains 11 departments of excellence. The centre has experienced significant growth and with a high heat demand the hospital required a solution that could not only provide sufficient warmth to the long open corridors but also ensure the safety of patients, visitors and staff.

OUR SOLUTION

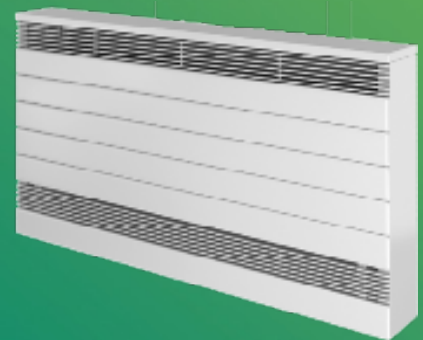

We supplied 33 Ultima LST radiators as they fit perfectly into the stylish interior of the centre. Our Touch Temperature LSTs were the ideal heating solution as they do not exceed a surface temperature of 43°C and the rounded corners also provide additional protection.

LOCATION: NEWPORT, WALES

SECTOR: NEW BUILD, HEALTHCARE

PRODUCTS: 33 ULTIMA LST RADIATORS

KEY FEATURES: BS EN 442 COMPLIANT,
CURVED EDGES FOR SAFETY

"MERRIOTT'S TOUGH TEMPERATURE LSTs WERE THE PERFECT CHOICE FOR US AS SAFETY IS PARAMOUNT. IT ALSO HELPS THAT THEY LOOK GREAT."
