# High Wycombe Leisure Centre

# Merriott

Project:  
New Build

Location:  
High Wycombe

Product(s) used:  
HD Radiant panels

Sector:  
Leisure

*"Merriott's radiant panels were the best solution for our new sports complex covering the entire 28metres of the hall."*

## The brief

High Wycombe recently opened a brand new £25m Sports and Leisure Centre. The 10,750m<sup>2</sup> complex provides the latest in sporting equipment and offers a diverse range of facilities open to the public. The client needed a heating solution for its large sports hall that would be robust and provide excellent energy efficiency.

## Our solution:

Our HD Radiant Panels are the ideal solution for use in sports halls and large open spaces, as not only can they cover the entire length of the hall (28 metres) but they are also extremely hard-wearing and ball impact tested. Our panels were installed in the Leisure Centre's 12 court sports hall and dance studio.

## Product key features:

- heating or cooling options
- energy savings of up to 40%
- alternative colours are available
